MAY 2021 - PRESENT

Heresy Infotech Pvt. Ltd, Hyderabad — UI Developer

MARCH 2014 - MAY 2021

EDUCATION

Nizam Institute of Engineering and Technology (NIET), Hyderabad — M.Tech(SE) - July 2011 - Oct 2013

TECHNICAL SKILLS

Languages

HTML, CSS, JavaScript/jQuery, Typescript, Dart, GraphQL

Frameworks

Angular, Node.js, Flutter, Magento, Gulp, Grunt, Webpack

Database

MySQL, Firebase, MongoDB, PostgreSQL, Dgraph.

TECHNICAL EXPERIENCE

Dynamic forms and visualisations | Angular

- ★ Worked on different sandboxes based on angular to deploy an AI / ML model and UI to use the same.
- ★ Automatically generate an Angular form based on a JSON Schema. Overridden and maintained an npm package called formly.dev to tweak many new features and styles as needed. Also, develop a component for different types of advanced visualization based on plotly.js and leaflet.js.

Automated Lab Reports | Angular, MongoDB

- ★ The user workflow is divided into three steps. An Effective UX that helps users create their own form schema for reports, stored the schema in the database and Achieved customised lab reports generation by using the same data with an angular dynamic form generator to enter the reports.
- ★ Printing of lab reports.

E-Prescription | Angular, MongoDB

- ★ Design and develop a prescription module that helps doctors write prescriptions within 10 seconds and print them in NABH accredited format

Frontdesk Application | Angular, MongoDB

- ★ Achieved a POS for HMS in which a user can bill a consultation and lab. It also handles discounts, refunds, credit vouchers, and free reviews of the patient. A user can also print the bill and the day end report.

Pharmacy Inventory Management and POS | Angular, MongoDB

- ★ Responsible for user adding GRN, Stock transfers, Returns, Calculating and displaying GST in the frontend and Printing bills and day end reports

Telemedicine | Flutter, Dart

- ★ Integrate Jitsi__meet for teleconsultation between patient and doctor.
- ★ Implemented a complete chat system using dash__chat and customized its UI.
- ★ E-prescriptions through a mobile app
- ★ Generated PDF for prescriptions and invoices using a printing flutter package.

- ★ Developed an automated web page for doctors/hospitals to increase their online presence using firebase and angular.

E-commerce | Magento, MySql

- ★ Inherited basic Magento theme and overridden it entirely with respect to the client requirements and maintained it.

SEO Optimization | JSON schema, google analytics | firebase

- ★ Website development with role-based inline edit, dynamic JSON LD schema, custom events, tagging and tracking in google analytics

Soft Skills | Team Management

- ★ Responsibilities include guiding new developers, debugging, designing and implementing end to end features.
- ★ Demonstrated experience in Agile methodologies
- ★ Collaboration and engagement skills
- ★ Experience in large scale web application delivery
- ★ Experience working with Communications and/or Marketing teams and/or Design Agencies
- ★ Demonstrated adaptability, goal orientated and innovative individual
- ★ A firm grasp of responsive design and mobile application design
