## PROJECTS

### **QScreening — *Angular, Ruby on rails, MongoDB — March 2014 to Oct 2016***

Automated Screening Tool for Employers: Built tools to help employers quickly screen hundreds of candidates using assessment tests.

### **SkillMapped — *Angular, Firebase — Nov 2016 to Nov 2017***

SkillMapped is a platform to assess your abilities. The best place to learn in a collaborative and iterative way. Our competitions will help you meet like minded people. Best place to learn new stuff, enhance skills.

### **Reachmore — *May 2015 to Sept 2018***

Marketing optimization is the core philosophy of Reachmore. We wanted to provide end to end solutions. Happy to announce the launch of <https://www.shopcart.com>. A complete wellness products manufacturing unit based out of Hyderabad. Stay tuned. We are adding more products!

### **ShopCart — *Html, JavaScript/Jquery, Magento — Feb 2018 to Nov 2018***

Shopcart is a general purpose e-commerce solution to sell products developed at Genomelabs manufacturing unit based out of Hyderabad.

\* Inherited basic magento theme and override it completely with respect to the client requirements and maintained it.

## **DigiHosp** — *Angular, GraphQL, Rails, MongoDB* — *Dec 2018 to Oct 2019*

Management first HMS application - completely web based solution with multiple brands and branches support at an enterprise level. Empowered by MAA Group of Hospitals.

### **\* Automated Lab Reports**

The user workflow is divided in three steps. An Effective UX that helps users create their own form schema for reports, stored the schema in the database and Achieved customised lab reports generation by using same data with angular dynamic form generator to enter the reports.

Printing of lab reports.

### **\* E-Prescription** | *Angular, MongoDB*

Design and develop a prescription module which helps doctors write prescriptions within 10 seconds and print it in NABH accredited format

### **\* Frontdesk Application** | *Angular, MongoDB*

Achieved a POS for HMS in which a user can bill a consultation and lab. It also handles discounts, refunds, credit vouchers, free reviews of the patient. A user can also print the bill and the day end report.

### **\* Pharmacy Inventory Management and POS**

Responsible for user adding GRN, Stock transfers, Returns, Calculating and displaying GST in the frontend and Printing bills and day end reports

## **Neftx** — *Nov 2019 to Present*

Platform as a service for single practitioners, clinics and hospitals with extensive features such as EMR/EHR and telemedicine.

### **\* Telemedicine** | *Flutter, Dart*

Integrate Jitsi\_meet for teleconsultation between patient and doctor.

Implemented a complete chat system using dash\_chat. Customized its UI.

E-prescriptions through mobile app

Generated PDF for prescription and invoices using a printing flutter package.

Developed an automated web page for doctors/hospitals to increase their online presence using firebase and angular.

Current responsibilities include guiding new developers, debugging, design and implementing end to end features.
