TECHNICAL EXPERIENCE

Automated Lab Reports | *Angular, MongoDB*

★ The user workflow is divided in three steps. An Effective UX that helps users create their own form schema for reports, stored the schema in the database and Achieved customised lab reports generation by using same data with angular dynamic form generator to enter the reports.

★ Printing of lab reports.

E-Prescription | *Angular, MongoDB*

★ Design and develop a prescription module which helps doctors write prescriptions within 10 seconds and print it in NABH accredited format

Frontdesk Application | *Angular, MongoDB*

★ Achieved a POS for HMS in which a user can bill a consultation and lab. It also handles discounts, refunds, credit vouchers, free reviews of the patient. A user can also print the bill and the day end report.

Pharmacy Inventory Management and POS | *Angular, MongoDB*

★ Responsible for user adding GRN, Stock transfers, Returns, Calculating and displaying GST in the frontend and Printing bills and day end reports

Telemedicine | *Flutter, Dart*

★ Integrate Jitsi_meet for teleconsultation between patient and doctor.
★ Implemented a complete chat system using dash_chat. Customized its UI.
★ E-prescriptions through mobile app
★ Generated PDF for prescription and invoices using a printing flutter package.
★ Developed an automated web page for doctors/hospitals to increase their online presence using firebase and angular.

E-commerce | *Magento, MySql*

★ Inherited basic magento theme and override it completely with respect to the client requirements and maintained it.

SEO Optimization | JSON schema, google analytics | firebase

- ★ Website development with role based inline edit, dynamic json ld schema, custom events, tagging and tracking in google analytics
